

**For Immediate Release**

## **Reticulate Micro Introduces VESPER™ Satellite Terminal Management Platform**

*First Space Segment Product, VESPER Enables Command and Control of all Terminals from a Single Common Operating Dashboard*

**PALM BAY, FL / February 6, 2024 /** Reticulate Micro, Inc. (“Reticulate Micro,” “Reticulate” or the “Company”), a defense technology company dedicated to delivering trusted and resilient communications over any transport and in any environment, has announced VESPER™ (Virtual Engineering Terminal for Satellite Performance Enhancement and Resourcing), a satellite terminal management platform and the Company’s first product within their recently launched Space business segment.

VESPER simplifies satellite network management to one screen – displaying fundamental health, metrics and positioning data across operational networks and terminals, with the ability to drill down to view subcomponent health.

VESPER enables seamless switching between terminal deployments, with the ability to accommodate configurations of thousands of terminals across enterprise networks, whether on-premise, in the cloud or at the edge. It is built on VisionOS™, the foundational platform common to all Reticulate products and featuring end-to-end quantum encryption.

"Managing satellite terminal networks has become increasingly challenging, especially with the proliferation of constellations in multiple orbits. VESPER coordinates and controls ever-expanding satellite terminal networks across broad distances from one central location," said Joshua Cryer, President and CEO of Reticulate Micro. "We're providing full line of sight to the network edge in a highly secure, easy-to-use platform. Operators can quickly mitigate the impact of terminal outages while providing unprecedented visibility to any underlying network issues."

The Company expects to begin initial customer deployments for VESPER in the second quarter, targeting the global monitoring and control market.

### **About Reticulate Micro, Inc.**

[Reticulate Micro, Inc.](#), with headquarters in Palm Bay, Florida, is a commercial and defense technology company dedicated to delivering trusted and resilient communications over any transport and in any environment. Reticulate is building one of the world's first quantum-protected open-systems platform for robust video streaming, simplified terminal management and satellite mobile connectivity in austere environments and diverse orbital regimes. Serving the defense, mobility, broadcasting, enterprise infrastructure monitoring and security sectors, Reticulate Micro and its newest business segment Reticulate Space embrace open standards across its software and product offerings.

### **Cautionary Note Regarding Forward-Looking Statements:**

This press release contains forward-looking statements that are subject to various risks and uncertainties. In addition, our representatives or we may make forward-looking statements orally or in writing from time to time. We base these forward-looking statements on our expectations and projections about future events, which we derive from the available information. Such forward-looking statements relate to future events or our future performance, including our financial performance and projections, revenue and earnings growth, and business prospects and opportunities. You can identify forward-looking statements by those that are not historical facts, particularly those that use terminology such as "intends," "may," "should," "expects," "anticipates," "contemplates," "estimates," "believes," "plans," "projected," "predicts," "potential," or "hopes" or the negative of these or similar terms. In evaluating these forward-looking statements, you should consider various factors, including our limited operating history, our ability to continue as a going concern, our ability to manage rapid growth, the potential loss of our senior officers and directors who we rely upon, our potential inability to maintain, train and build an effective sales and marketing infrastructure, our need for additional financing to accomplish our business strategy, the reception of our technology by the market, our ability to compete effectively in a very competitive environment, our ability to build brand awareness and brand loyalty, potential supply limitations, our potential inability to protect our intellectual property, the possibility that our products become obsolete, risks associated with our use of certain artificial intelligence and machine learning models, and failures, or perceived failures, to comply with privacy, data protection, and information security requirements in the variety of jurisdictions in which we operate or plan to operate. These and other factors may cause our results to differ materially from any forward-looking statement. Forward-looking statements are only predictions.

The forward-looking statements discussed in this press release, and other statements made from time to time by our representatives, may not occur, and actual events and results may differ materially and are subject to risks, uncertainties, and assumptions about us. The forward-looking statements contained in this press release are made as of the date of this press release, and the Company does not undertake any responsibility to publicly update or revise any forward-looking statement in this release, except in accordance with applicable law.
